

DEPLOY TO CLOUDFLARE

Your Pre-Flight Checklist

PRE-FLIGHT CHECK

- Widget built and working locally?
- Specs documented?
- Must-dos tested?
- Files saved?

DEPLOY: STEP BY STEP

- STEP 1: Go to cloudflare.com and log in**
- STEP 2: Click "Workers & Pages"**
- STEP 3: Click "Create" > "Pages"**
- STEP 4: Choose "Direct Upload"**
- STEP 5: Name your project (lowercase, no spaces)**
- STEP 6: Drag your files in**
- STEP 7: Click "Deploy"**
- STEP 8: YOUR WIDGET IS LIVE!**

POST-DEPLOY: THE ASSUMPTION TRAP

- Does the page load?
- Click every button. Do they work?
- Fill out every form. Does it submit?
- Try it on your phone.
- Try submitting garbage.

If a human hasn't clicked every button, it's not tested.

Cost of hosting: \$0. Cost of SSL: \$0. Cost of excuses: expired.

"You built it. You shipped it. You're a builder now."
